

## WARRANTY

**TOPRING** warrants its products to be free from defects in material and workmanship under normal wear and service, for a period of 1 year from the date of sale to the end user. Product breakage due to poor material or workmanship usually occurs within the first few days of use. Therefore it is very important to advise the end user to inform you immediately in this case.

**TOPRING's** liability will be limited to an exchange or replacement with a substitute product.

This warranty does not apply if:

- the article is used against specifications
- the product is subject to abuse or neglect
- breakage results from an accident or inappropriate use
- the product is at the end of its life cycle

**TOPRING** will not be held liable or responsible for injuries or damages to persons or property arising out of the use or operation of **TOPRING** products.

**THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES**, expressed or implied, including any implied warranty of sale of goods for a particular purpose, liability for lost profit or for indirect, incidental, consequential or commercial losses, and of all other obligations or liabilities. (These conditions are subject to change without notice.)

---

## MAINTENANCE

Several **TOPRING** products require periodic maintenance. For example:

- Air dryers
- Filters
- Regulators
- Lubricators
- Dessiccant air dryer
- Drains
- Pneumatic tools
- Tool balancers
- Hose reels
- Valves
- Cylinders

These products have a long life, if they are used according to specifications and if maintenance is performed regularly. Replacement parts are available for many of our products.

For example, filters are designed to accumulate impurities. Therefore, the filter element must be replaced periodically. A contaminated filter is not considered a defective product, but a product that needs maintenance.

Hose reels are products that are very durable but hoses, which are an integral part of hose reels are products that are subject to wear and must be replaced at regular intervals.

Other products have a limited life. For example:

- Self-storing hoses
- Quick couplers
- Push-in fittings
- Pneumatic tubing
- Plastic blow guns
- Air hoses
- Mufflers

These products are subject to operating conditions that cause regular wear and tear and consequently have a limited life.

The majority of problems with these products occur when they are not used according to their specifications (i.e. temperature, pressure or with non compatible chemical products).

These types of products may need to be replaced by the user at regular intervals in order to minimize pressure loss and accidents.
