

GATE BRACKET KIT

The gate brackets assure a squared non deformable gate frame. Can be used with divers horizontal rail sizes: 2" x 3", 2" x 4", 2" x 6" and more. Install on custom sized gates, pre-fab gates or fence panels.

Instructions:

Tools required: Saw, drill, 1/8" drill bit, screwdriver or power driver.

Note: All holes have to be pre-drilled with 1/8" drill bit.

1- Determine which way the gate will swing and attach the brackets and brackets with hinges to the top and bottom rail using wood screws (W) in the holes on the outside edge. Then, use the pan head screws (P) in the locations indicated as shown. (Fig. 1)

2-Using 2 pan head screws (P) for each bracket, assemble side rails to the top and bottom brackets. (Fig. 2)

3- Fasten the bracket with hinge to the side rails with wood screws (W). (Fig. 3)

4- Attach the door facing or fence boards to the frame et fasten the hinges to the 4" x 4" post or door frame with the remaining wood screws (W). (Fig. 4)
