## POST-CATALYZED PRODUCTS

Setting the Bar. For lasting performance that's also user-friendly, look no further than Chemcraft. Perfect for furniture, cabinetry or any wood surface that needs to weather a household storm of cleansers and chemicals. When it needs to be durable and easy-to-use, we have the solution.

### ■ CHEMLIFE™ 24 Topcoat\*\*

A true 24 hour pot life conversion varnish. Finally, a product that delivers exceptional chemical resistance with ease of application. CHEMLIFE 24 is designed to minimize waste, resulting in lower production costs. This newly developed product provides superior vertical hang and brings clarity to a new level.

### ■ CHEMLIFE™ 24 WHITE Pigmented Topcoat

A true 24 hour pot life. A pigmented topcoat with high solids that can be tinted with 844 bases. Clean, durable and dependable. CHEMLIFE 24 delivers a high impact resistance finish that will stand the test of time. CHEMLIFE 24 passes all KCMA finish testing.

### ■ CHEMLIFE™ 24 Sealer

When you don't want to compromise pot life vs. the benefit of having a two-component sealer. CHEMLIFE 24 Sealer was designed to give you the same maximum extended full day, 24 hour pot life without sacrificing any of the things you expect from a sanding sealer. High solids, good build and quick and easy sanding combine to give you a system that meets all the KCMA and AWI finish standards for kitchen cabinets. All of this designed to work hand-in-glove with the CHEMLIFE 24 line of topcoats.

### ■ CHEMLIFE™ 24 Primer

CHEMLIFE 24 Primer is a true 24 hour pot life primer solution. Very high build and high solids make it a great choice for use on hardwoods and MDF. Excellent hold out and good vertical hang. Available in three versions -- white, black and neutral -- all primers can be tinted with 844 tints and used with Nitrocellulose, Pre-Catalyzed and Post-Catalyzed topcoats.

### ■ CHEMVINYL HS (high solid) Sealer

This state-of-the-art catalyzed vinyl sealer delivers superior adhesion over a wide variety of stains and substrates. This, along with its extreme moisture resistance, makes it an excellent choice for kitchen cabinets. It also provides exceptional build due to its high solid design.

## ■ PLASTOFIX® LIGHT Topcoat\*\*

Quick building, water white and resistant to yellowing, PLASTOFIX LIGHT has held the top spot in conversion varnishes for over a decade. No other conversion varnish has been able to deliver the look, feel and resistance that the PLASTOFIX LIGHT products provide. PLASTOFIX LIGHT passes all KCMA finish testing.

## ■ E-VAR Topcoat\*\*

Building on the success of PLASTOFIX LIGHT, Chemcraft customers have enjoyed a new level of success with E-VAR 80. Not just a lower-cost alternative to PLASTOFIX, we have made this conversion varnish product even more user-friendly. E-VAR 80 maintains high solids and also manages to come in at an easy-to-spray viscosity. E-VAR 80 passes all KCMA finish testing.

## ■ DANSPEED® ELITE Topcoat

DANSPEED ELITE has long been the gold standard of catalyzed lacquers. DANSPEED is an extremely tough catalyzed lacquer system designed to bring outstanding durability and unmatched refinement to a multitude of wood products. Chemcraft's line of elite products helps provide a barrier from UV light. DANSPEED ELITE passes all KCMA finish testing.

## ■ DANSPEED® II Topcoat

DANSPEED II is a fast-curing, self-seal, catalyzed lacquer. It offers enhanced light stability, thanks to UV inhibitors added to the formulation. In addition, DANSPEED II combines the feel of a lacquer with the durability of a varnish. No wonder it's the finish of choice for the kitchen cabinet industry. DANSPEED II passes all KCMA testing.

## ■ DANSEAL Sealer\*\*

Catalyzed sealer formulated for use under all acid-catalyzed systems. High solid and easy to apply, this one will meet all your application needs. Just add catalyst. With DANSEAL it's that simple.

## ■ PLASTICOLOR Pigmented Topcoat\*\*

The ultimate topcoat for the ultimate primer, PLASTICOLOR is high in solids and can be tinted with standard 844 tint bases. Available in a clear and in a mid tone, Chemcraft has a full fan deck available with formulas, allowing you quick color matches and offerings. PLASTICOLOR's smooth, highly impact resistant finish will stand the test of time, even in the most demanding of kitchens. PLASTICOLOR passes all KCMA finish testing.

## ■ PLASTIPRIMER - MDF Pigmented Primer

PLASTIPRIMER for MDF makes finishing MDF a breeze, often needing only one to two primer coats and one topcoat. After priming and before applying topcoat, many have remarked that the MDF door looks finished and ready to ship.

## ■ PLASTIPRIMER - HARDWOOD Pigmented Primer

PLASTIPRIMER was developed to give extra adhesion properties to wooden surfaces, and it ships in a lower viscosity. Air-dry to sand in <1 hour. Sands easily down to a smooth base for your topcoat of choice. ~65% solids means full hide in one coat.

## ■ PLASTIPRIMER PLUS

PLASTIPRIMER PLUS was developed for both hardwoods and MDF. This product offers excellent filling capabilities due to its high solid content. PLASTIPRIMER PLUS is the fastest drying, acid curing primer for interior use, and gives a smooth, dense finish suitable for topcoating to produce very high quality pieces. It provides an excellent base and is extremely easy to sand.
