NITROCELLULOSE PRODUCTS

Tried and True. Our single-component products of Nitrocellulose technology have withstood the test of time. Their ease of use, superior flexibility and high build make them perfect for furniture, moldings and all commodity based production. These products are specifically designed to help assure adhesion in the kinds of multi-step systems used for years in the furniture industry.

■ CHEMLACK Topcoat** (available in water white and amber)

CHEMLACK has been a permanent fixture for decades in high production facilities throughout the world. Available in either amber or water white in the container. These products are excellent for use with multi-step finishes, e.g., glazes, toners and pad stains. Quick drying with great workability, they have excellent flow characteristics designed to work within your environment. When dry times are critical, it's recommended to use this group with compatible sealers that have been designed for speed. They are easily repairable and consistently deliver great results.

■ CHEMLACK WHITE Pigmented Topcoat**

When cost is a consideration on a pigmented project you don't have to sacrifice the "look" for the \$\$\$; these products consistently deliver a mar resistant finish that can easily be tinted to meet your color needs. Products are available in all stock sheens: 20, 35, 50 and high gloss 90. These are the same as their clear counterparts listed above. High solids designed for use over a multitude of primers.

■ CHEMLACK EXPRESS Topcoat** (available in water white)

When your product requires a quality finish at a competitive cost, you don't have to walk away. This one is designed for speed. It has a quick dry formula that still gives good build and applies easily. And, like its counterparts, it is excellent for use with multi-step finishes, e.g., glazes, toners and pad stains. Not recommended for use over light color stains, colors or natural woods like maple and pine.

■ CHEMLACK EXPRESS WHITE Topcoat**

CHEMLACK EXPRESS WHITE Topcoat is a scratch resistant, single-component Nitrocellulose lacquer that provides good depth and a nice, smooth surface. The product dries rapidly and has a smooth feel when fully cured.

■ CHEMSEAL Sealer** (available in amber)

This Nitrocellulose sealer comes ready to use in a fast dry, quick build, easy-to-sand formulation. Designed to deliver user-friendly performance under our full range of Chemlack products.

Additional Products: CHEMVINYL**, CHEMVINYL HS - see our Vinyl Sealers technology sheet for these products.
For other sealer options, contact your local representative.
For additional information refer to the individual product information sheets.

**  Available in 275 / 550 VOC compliant
