

The highboard Lemans II is an addition to the range of Richelieu's blind corner storage solutions.

The highboard kitchen cabinets are a new trend, in modern kitchens.

The height of these cabinets offer better ergonomics for the end user.

With Lemans II "highboard", you offer a better solution for the blind corner units in that type of design.

The highboard Lemans II allows to install 4 shelves in a blind corner cabinet

Features and benefits

- Post comes with 2 rails for mounting (connector of the 2 rails is included).
- Installation dimensions required, remain the same than a standard Lemans II application except for the height: you need an internal height of 1265mm (49 7/8" to install the post). Consider as well the extra height of the items stored on the upper shelf.
- 4 shelves can be adjusted in the height..
- For a complete unit, you will need to order 2 standard Lemans II system + one highboard set #2504100.
- For the installation in a highboard application, you don't need to use post and hardware of the standard version, you will only use the post and hardware that come with the #2504100 set.

Products to order separately

- **693-X-140-100 ou 150** : 2 sets of standard Lemans II in grey or maple (required)
- **693630** : opening restrictor (option)
