Spectrem® 2

Sellador de silicona de alto rendimiento

Descripción del producto

Spectrem 2 es un sellador de silicona de alto rendimiento de un componente, de módulo medio y curado neutro, ideal para una amplia variedad de aplicaciones de vidriado y calafateo perimetral.

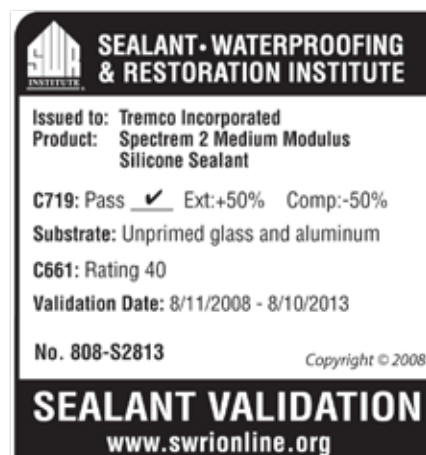

Usos básicos

- Vidriado estructural de dos lados
- Sellos perimetrales y climáticos
- Cordones tipo tapa, talón y puntera
- Juntas de fachadas tipo 'curtainwall' o de ventanas

Spectrem 2 puede utilizarse sobre sustratos como aluminio, vidrio, acero, metal pintado, plástico, piedra, hormigón y ladrillo. Spectrem 2 exhibe adherencia sin imprimación en los materiales de construcción más comunes.

Spectrem 2 actúa también como adhesivo, utilizado en conjunto con Spectrem Simple Seal™. Simple Seal se utiliza como sellador puente, tanto en construcciones nuevas como en trabajos de restauración. (Para conocer más sobre este producto, consulte la hoja de datos de Simple Seal).

Todas las aplicaciones de vidriado estructural deben ser revisadas y aprobadas por el Servicio Técnico de Tremco antes de la aplicación de Spectrem 2.

Normas aplicables

Cumple con las normas ASTM C920 Tipo S, Grado NS, Clase 50, Uso NT, M, G, A y O, CAN/CGSB-19.13-M87, Especificación Federal de los EE. UU. TT-S-001543A (COM-NBS) Clase A y Especificación Federal de los EE. UU. TT-S-00230C (COM-NBS) Clase A, Tipo II. INSTALACIÓN

Diseño de juntas

Puede utilizarse en cualquier junta diseñada de acuerdo con las prácticas aceptadas de arquitectura o ingeniería. El ancho de la junta debe ser igual a 4 veces el movimiento esperado, pero no menor de 6.4 mm (1/4").

Dimensiones de las juntas

Para juntas de 6.4 mm (1/4") a 12.7 mm (1/2") de ancho, la profundidad debe ser igual al ancho (relación ancho/profundidad igual a 1). Las juntas de 12.7 mm (1/2") de ancho y mayores deben tener una profundidad de 12.7 mm (1/2"). El tamaño mínimo de la junta es 6.4 mm x 6.4 mm (1/4" x 1/4").

Preparación de superficies

Para lograr una buena adherencia, la interfaz de la junta debe estar en buen estado, limpia y seca. Según sean los sustratos, la interfaz de la junta puede requerir un cepillado bien a fondo con cepillo de alambre, esmerilado, arenado, lavado con solvente y/o imprimación.

Trabajado y limpieza

Se recomienda realizar el trabajado inmediatamente después de la aplicación para asegurar un contacto firme e íntimo con la interfaz de la junta. Se prefiere el trabajado en seco. La limpieza se puede realizar con solventes como xileno, tolueno o metiletilcetona (MEK), mientras el sellador permanezca en el estado no curado.

Respaldo de juntas

Cinta interruptora de adherencia

Se prefieren como respaldo de juntas las varillas de respaldo de polietileno de celda cerrada, para controlar la profundidad del cordón de sellador. Allí donde la profundidad de la junta impida el uso de respaldo, debe instalarse una cinta de polietileno con respaldo adhesivo para impedir la adherencia de tres lados. El respaldo de la junta debe estar seco en el momento de la aplicación del sellador.

Aplicación

Spectrem 2 se aplica fácilmente con equipos de calafateo convencionales. Llene la junta por completo y realice el trabajado. A 23.9 °C (75 °F) y una humedad relativa de 50%, normalmente se forma una 'piel' durable en menos de 10 minutos. Para obtener instrucciones de aplicación completas visite tremcosealants.com.

Mantenimiento

El sellador dañado puede repararse. Consulte sobre los procedimientos de reparación con su Representante o Distribuidor Tremco.

Limitaciones

- No lo aplique en superficies húmedas o contaminadas.
- Utilícelo con ventilación adecuada.
- Las siliconas transparentes no se recomiendan para aplicaciones de vidrio estructural.
- No está destinado para la inmersión continua en agua.

Garantía

Tremco garantiza que sus selladores están libres de defectos de materiales, pero no garantiza su aspecto o color. Dado que los métodos de aplicación y las condiciones de cada sitio están más allá de nuestro control y pueden afectar el desempeño, Tremco no ofrece ninguna otra garantía, expresa o implícita, con inclusión de las garantías de COMERCIALIZACIÓN y ADECUACIÓN PARA UN PROPÓSITO PARTICULAR, en relación con los selladores. La obligación exclusiva de Tremco será, a su opción, reemplazar o reintegrar el importe del precio de compra de la cantidad de sellador que se encontró con defectos, y Tremco no será responsable de ninguna pérdida o daño.

Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

Individual protection measures, such as personal protective equipment

General information: Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Supplementary local exhaust ventilation, closed systems, or respiratory and eye protection may be needed in special circumstances, such as poorly ventilated spaces, heating, evaporation of liquids from large surfaces, spraying of mists, mechanical generation of dusts, drying of solids, etc.

Eye/face protection: Wear safety glasses with side shields (or goggles).

Skin Protection

Hand Protection: Use suitable protective gloves if risk of skin contact.

Other: Wear suitable protective clothing.

Respiratory Protection: In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.

Hygiene measures: Observe good industrial hygiene practices. Wash hands before breaks and immediately after handling the product. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use.

Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

Individual protection measures, such as personal protective equipment

General information: Provide easy access to water supply and eye wash facilities. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Eye/face protection: Wear safety glasses with side shields (or goggles).

Skin Protection

Hand Protection: Use suitable protective gloves if risk of skin contact.

Other: Wear chemical-resistant gloves, footwear, and protective clothing appropriate for the risk of exposure. Contact health and safety professional or manufacturer for specific information.

Respiratory Protection: In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.

Hygiene measures: Avoid contact with eyes. Observe good industrial hygiene practices. Wash contaminated clothing before reuse. Avoid contact with skin. Wash hands before breaks and immediately after handling the product.

5. Fire-fighting measures

General Fire Hazards: No unusual fire or explosion hazards noted.

Suitable (and unsuitable) extinguishing media

Suitable extinguishing media: Use fire-extinguishing media appropriate for surrounding materials.

Unsuitable extinguishing media: Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical: During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters

Special fire fighting procedures: No data available.

Special protective equipment for fire-fighters: Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures: No data available.

Methods and material for containment and cleaning up: Collect spillage in containers, seal securely and deliver for disposal according to local regulations.

Notification Procedures: In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

Environmental Precautions: Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water sources or sewer. Environmental manager must be informed of all major spillages.

7. Handling and storage

Precautions for safe handling: Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. Use personal protective equipment as required. Ventilate well, avoid breathing vapors. Use approved respirator if air contamination is above accepted level. Use mechanical ventilation in case of handling which causes formation of dust.

Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

Individual protection measures, such as personal protective equipment

General information: Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Supplementary local exhaust ventilation, closed systems, or respiratory and eye protection may be needed in special circumstances, such as poorly ventilated spaces, heating, evaporation of liquids from large surfaces, spraying of mists, mechanical generation of dusts, drying of solids, etc.

Eye/face protection: Wear safety glasses with side shields (or goggles).

Skin Protection

Hand Protection: Use suitable protective gloves if risk of skin contact.

Other: Wear suitable protective clothing.

Respiratory Protection: In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.

Hygiene measures: Observe good industrial hygiene practices. Wash hands before breaks and immediately after handling the product. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use.

Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

Individual protection measures, such as personal protective equipment

- General information:** Provide easy access to water supply and eye wash facilities. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.
- Eye/face protection:** Wear safety glasses with side shields (or goggles).
- Skin Protection**
- Hand Protection:** Use suitable protective gloves if risk of skin contact.
- Other:** Wear chemical-resistant gloves, footwear, and protective clothing appropriate for the risk of exposure. Contact health and safety professional or manufacturer for specific information.
- Respiratory Protection:** In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.
- Hygiene measures:** Observe good industrial hygiene practices. Wash hands before breaks and immediately after handling the product. Avoid contact with eyes. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. Wash contaminated clothing before reuse. Avoid contact with skin.

Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

Individual protection measures, such as personal protective equipment

General information:	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Supplementary local exhaust ventilation, closed systems, or respiratory and eye protection may be needed in special circumstances, such as poorly ventilated spaces, heating, evaporation of liquids from large surfaces, spraying of mists, mechanical generation of dusts, drying of solids, etc.
Eye/face protection:	Wear safety glasses with side shields (or goggles).
Skin Protection	
Hand Protection:	Use suitable protective gloves if risk of skin contact.
Other:	Wear suitable protective clothing.
Respiratory Protection:	In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.
Hygiene measures:	Observe good industrial hygiene practices. Wash hands before breaks and immediately after handling the product. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use.

Tremco Incorporated is an organization that is committed to quality, our employees, and our environment. We are responsive to both internal and external customers, and we pledge to treat everyone with good stewardship and respect.

Tremco Incorporated certifies the following for Spectrem 2:

Building Product Disclosure and Optimization:

Spectrem 2 is manufactured in Toronto, Ontario, Canada.

No single extracted material is used to produce the majority of this product.

Recycled content for Spectrem 2 is not available, and for the purposes of LEED reporting should be assumed to be zero.

Low Emitting Materials - VOC Content Information:

Spectrem 2 is a silicone sealant with a VOC content of 42g/L equaling 3% as applied/mixed. As such, VOC levels are lower than the limits set by SCAQMD rule 1168.

Note: VOC content values are as reported for the highest VOC content color for all Spectrem 2 colors. Other colors may have a lower VOC content reported on the SDS.

This product is Greenguard certified, meaning it has met some of the world's most difficult and complete standards for low emissions of VOC's into indoor air. This product also adheres to the California Department of Public Health (CDPH) Standard Method V1.1-2010, a standard vital to demonstrate compliance with LEED.
