

Applications

- Installs at the top of standard 500mm double wall drawer in a 600mm wide kitchen cabinet.
- Best solution for products you can neither store in a regular pantry unit or a fridge like onions, potatoes, bread, garlic, fruits...

Advantages

- Stable, easy to clean WHITE plastic box is the base of the pantry box.
- Including wooden grid for bakery products and plastic grid for vegetables and fruits.
- Grid comes with drainage and ventilation slots.
- Includes as well, a white carry-box (transportable plastic container with handle).

Description

Innovation for dry food storage !

The Pantry Box is a system that consists of a washable plastic box which is the base module. Depending on what is desired to be stored, there is a removable plastic grid with drip and ventilation slots (vegetables) or a well-designed, high-quality wood grid (bread) to customise the drawer. A toughened glass sliding lid covers the contents hygienically, yet allows for easy visibility into the drawer. This practical drawer has a nominal depth of 500mm and is supplemented by a removable, portable plastic container that can transport food during preparation, if required.
