

Lunch II: functional side table ready in a snap!

Advantages

- Comes complete except for the table top, that has to be done by the customer. So that you can match the color of your countertop.
- Heavy duty aluminum slides: weight capacity of 60kg (132lbs).
- Installed instead of a drawer, behind a hinged front, you can tilt down . .
- SOSS and sewing machine hinges types for table top assembly included.
- The frontal bar is used as a handle to pull out the table.
- Width can be adapted, by cutting to size the front bar (from 410 to 1170mm, 16 1/8" up to 49 1/16").
- approx. total table extension: 895mm (35 7/16")

LUNCH II : innovation that will help you to save space and add function to your home!

This system consist of a table top that hides into a space usually used for a drawer. The table is instantly pulled in tilting the drawer front panel. Designed for fonctionnality needs in a small kitchen where it needs a table top for breakfast or simply as an extension work surface, extend up to 895mm (35 7/16"). Accomodates 3 or 4 peoples.

The main characteristic of this product is that every components are integrated to the system without having to store extension panels somewhere else.
