

At the bottom of the picture, you see the shoe rack # **53526100**

Description

"WALL-OUT" : the storage revolution.

Its a unique storage system that requires only 8" of depth. An incomparable space saving that offers a better view to stored clothes in a Walk-in, small closet or any other structure that can accept this easy installation system. It can be installed directly to the wall, on a door or in a cabinet. Suitable for homes, hotels, recreative vehicules, office, between much others. Ideal for people with restraint mobility and in a rolling chair. This system is not an alternative to storage, but simply the new way to store clothes.

Unique closet system that requires only 8" depth.

Application

- Homes
- Hotels
- Recreative vehicules
- Etc

Advantages

- Require only 8" depth, thanks to its friction plate that keeps hangers in place.
- Can be installed to the wall, in a cabinet as well as on a door.
- Complete system of 30" or 48" width are available.
- The friction plate at the end of the bar allows to hold the hangers in place throughout the bar.
- Each hanger can hold 3 pieces of clothes, so 16 pieces by linear foot.
- Easy installation, simply find the vertical studs, drill the bar consequently and screw the bar in the studs and you are ready to use your system.
- Reversible, can be installed regardless to right or left.
- Lateral support is also included to hang skirts, jackets, accessories, etc.

Technical Information

53530100 : Width of the wood bar of 30"

53548100 : Width of the wood bar of 48"
