

# PEANUT<sup>®</sup>3 CONNECTOR

ASSEMBLY HAS NEVER BEEN SO QUICK AND EASY, 100% CONCEALED

The ideal solution for fast assembly by large-scale manufacturers

## What does PEANUT<sup>®</sup> 3 do?

The PEANUT<sup>®</sup> 3 is a single-component, invisible connector and the optimum solution for large-scale manufacturers. It is designed for fast assembly and is compatible with auto-insertion machines, large-scale production line insertion machines and end-drilling machines. The short dowel length makes it a very versatile connector, able to produce perfect 45°, 90°, face-to-face, and end-to-end connections.

## Specifications

- Material: Fiberglass-reinforced nylon
- Insertion type: Dismountable
- Panel thickness for 45° joint min. 23/32" (18 mm)
- Panel thickness for 90° joint min. 19/32" (15.3 mm)
- Finish: Anthracite black

## ADVANTAGES AND BENEFITS

- A self-clamping, single component invisible connector
- Dome-shaped head for powerful clamping force that pulls panels together securely and solidly
- Quick and simple assembly of cabinets, no tools required
- Allows you to make ready-to-assemble furniture
- Ideal for boring and insertion machines
- For applications requiring additional setting force, the use of glue can improve the strength of the joint formed by PEANUT® 3
- Can be reassembled many times

## APPLICATIONS

- Kitchen and bathroom cabinet assembly, etc
- Furniture assembly
- Light structures assembly
- Exhibition stand building
- Advertising panel
- Installation of interior partitions
- Prototype building
