## 1 Identification

- · Product identifier
  - · Product number LNB110
  - Trade name: <u>HARDENER</u>
    - · Application of the substance / the mixture For professional use

#### · Details of the supplier of the safety data sheet

- Manufacturer/Supplier:
   IVM Chemicals srl
   Viale della Stazione 3 27020 Parona (PV) Italy tel +39 038425441
- Information department: Environmental Health and safety office hseoffice@ivmchemicals.com
- Emergency telephone number:
- ChemTel Expert Assistance Hotline/SDS Fax Access by dialing 1-800-255-3924 or for International +1-813-248-0585.

## 2 Hazard(s) identification

#### <sup>.</sup> Classification of the substance or mixture

Flam. Liq. 2	H225 Highly flammable liquid and vapor.
Eye Irrit. 2A	H319 Causes serious eye irritation.
Resp. Sens. 1	H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin Sens. 1	H317 May cause an allergic skin reaction.
Carc. 2	H351 Suspected of causing cancer.
STOT SE 3	H336 May cause drowsiness or dizziness.

#### · Label elements

· GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS). • Hazard pictograms

· Signal word Danger

• Hazard-determining components of labeling: Polyisocyanate HDI/TDI n-butyl acetate m-tolylidene diisocyanate HDI Homopolymer hexamethylene diisocyanate

· Hazard statements

H225 Highly flammable liquid and vapor.

H319 Causes serious eye irritation.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

- H317 May cause an allergic skin reaction.
- H351 Suspected of causing cancer.

H336 May cause drowsiness or dizziness.

#### 3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description: Mixture: consisting of the following components.

123-86-4	n-butyl acetate	40-49.99%
	<ul> <li>Flam. Liq. 3, H226</li> <li>STOT SE 3, H336</li> </ul>	
26426-91-5	Polyisocyanate HDI/TDI	20-24.99%
	🚸 Eye Irrit. 2A, H319; Skin Sens. 1, H317	
141-78-6	ethyl acetate	12.5-15%
	<ul> <li>Flam. Liq. 2, H225</li> <li>Eye Irrit. 2A, H319; STOT SE 3, H336</li> </ul>	
28182-81-2	HDI Homopolymer	10-12.49%
	Acute Tox. 4, H332; Skin Sens. 1, H317; STOT SE 3, H335	
108-94-1	cyclohexanone	1-2.49%
	<ul> <li>Flam. Liq. 3, H226</li> <li>Eye Dam. 1, H318</li> </ul>	
	🚯 Acute Tox. 4, H332; Skin Irrit. 2, H315

#### 4 First-aid measures

#### · Description of first aid measures

- General information:
- Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

- personal protective equipment for first aid responders is recommended. (please see section 8) · *After inhalation*:
- Supply fresh air and to be sure call for a doctor.
- In case of unconsciousness place patient stably in side position for transportation.
- After skin contact: Immediately wash with water and soap and rinse thoroughly.
- · After eye contact:
- Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
- · After swallowing: Do not induce vomiting; immediately call for medical help.
- <sup>•</sup> Information for doctor:
  - Most important symptoms and effects, both acute and delayed Allergic reactions
  - For symptoms and effects caused by substances, refer to Section 11.
  - Indication of any immediate medical attention and special treatment needed No further relevant information available.

## 5 Fire-fighting measures

#### · Extinguishing media

- · Suitable extinguishing agents:
- Alcohol resistant foam
- Alcohol resistant foam, CO, powder, water spray/mist.
- For safety reasons unsuitable extinguishing agents:
- Do not use a jet water stream as it may scatter and spread fire.

## Special hazards arising from the substance or mixture

- In case of fire, the following can be released: Nitrogen oxides (NOx)
- Carbon monoxide (CO)
- Advice for firefighters

Cool by spraying with water the containers to prevent product decomposition and the development of substances potentially hazardous for health and also, in the case of closed containers exposed to flames to prevent explosions.

• Protective equipment:

Hardhat with visor, fireproof clothing, suitable gloves and if necessary respiratory protective device.

### 6 Accidental release measures

• **Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation Keep away from ignition sources

• Environmental precautions: Do not allow to enter sewers/ surface or ground water.

• Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to Section 13.

Ensure adequate ventilation.

• **Reference to other sections** See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

#### · Protective Action Criteria for Chemicals

• PAC-1:		
123-86-4	n-butyl acetate	5 ppm
141-78-6	ethyl acetate	1,200 ppm
28182-81-2	HDI Homopolymer	7.8 mg/m <sup>3</sup>
108-94-1	cyclohexanone	60 ppm
822-06-0	hexamethylene diisocyanate	0.018 ppm
26471-62-5	m-tolylidene diisocyanate	0.02 ppm
· PAC-2:		
123-86-4	n-butyl acetate	200 ppm
141-78-6	ethyl acetate	1,700 ppm
28182-81-2	HDI Homopolymer	86 mg/m³
108-94-1	cyclohexanone	830 ppm

#### 7 Handling and storage

#### · Handling:

· Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace.

Open and handle receptacle with care.

Prevent formation of aerosols.

Protect against electrostatic charges.

Keep respiratory protective device available.

Use explosion-proof apparatus / fittings and spark-proof tools.

· Information about protection against explosions and fires:

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges.

Keep respiratory protective device available.

#### · Conditions for safe storage, including any incompatibilities

· Storage:

- · Requirements to be met by storerooms and receptacles:
- Store in a cool, well-ventilated area, away from heat and sources of ignition
- Provide solvent resistant, sealed floor.

Observe the label precautions, the expiration date for the use, if not indicated, is from delivery date of goods.

In cases where there is no reported expiration date , it means that the product must be used within 8 months.

- · Information about storage in one common storage facility: Not required.
- Further information about storage conditions: Keep receptacle tightly sealed.

Store in cool, dry conditions in well sealed receptacles.

• Specific end use(s) Those typical of the product and the instructions in the data sheet if required.

#### 8 Exposure controls/personal protection

· Additional information about design of technical systems: No further data; see item 7.

#### · Control parameters

• Components with limit values that require monitoring at the workplace:

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit.

At this time, the other constituents have no known exposure limits.

#### 123-86-4 n-butyl acetate

- PEL Long-term value: 710 mg/m<sup>3</sup>, 150 ppm
- REL Short-term value: 950 mg/m<sup>3</sup>, 200 ppm Long-term value: 710 mg/m<sup>3</sup>, 150 ppm
- TLV Short-term value: 150 ppm Long-term value: 50 ppm

### 141-78-6 ethyl acetate

PEL Long-term value: 1400 mg/m<sup>3</sup>, 400 ppm

REL Long-term value: 1400 mg/m<sup>3</sup>, 400 ppm

TLV Long-term value: 400 ppm

• Breathing equipment: Short term filter device: Suitable respiratory protective device recommended. Filter A · Protection of hands: Protective gloves Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation The glove material has to be impermeable and resistant to the product . · Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. · Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
