

PRE-FINISHED POPLAR DRAWER SIDES

With an UV
lacquer for high
resistance

Hardwood durable and resistant to warping

These drawer sides are an high resistance to shocks and scratches and they offer a smooth and attractive surface, making them a visually appealing option for your cabinetry. They are pre-finished, grooved and chamfered which means they don't require any extra effort in the finishing process and are ready to be cut to size and installed. Poplar is also known for its workability, making it easy to cut and shape to fit your specific project needs.
