FIXING BRACKETS

Some drawer dimensions are not standard, which can cause the organizer system to move every time you close or open the drawer. These easy-to-install fixing brackets are the perfect solution. The bracket kit includes two fixing brackets and two screws to fix the Organiz-R system to the bottom of the drawer.

NON-SLIP MAT

Protects drawer bottoms and prevents the system from moving when you open or close the drawer. The anthracite mat is a perfect match with the Organiz-R color palette and can be cut to any specific dimensions to exactly fit a drawer.
