

A SMOOTH, RICH AND  
LONG-LASTING SURFACE

HPL LAMINATES

EDGEBANDING

PANELS

ZENIT by Alvic is made of a superior MDF panel to which a layer of lacquer dried by UV radiation is applied to the front side. This supermatte lacquer layer imparts physical and mechanical properties to the panel, giving it high resistance to scratches and heat, as well as unrivaled surface durability. The unique formula developed by Alvic makes it possible to achieve a gloss level as low as 3% without compromising its velvety touch and its anti-fingerprint properties. The new ZENIT 2024 collection is now available in a wide range of trendy colors, suitable for any interior design style. You can create rich and harmonious combinations by integrating Alvic's other surface technologies, such as Brillanté (mirror effect) and Synchron (natural structured surfaces).

### PANELS

- 48" x 108" x 18 mm
