Opla Folding is a sliding pull-out worktop hidden under a counter or shelf and offers additional working surface in a fingertip.

Applications

Can be installed in any room where extra work surface is needed.

Advantages

- Complete system, only the top table and sides have to be made by customer to harmonize with the existing countertop or shelf. The thickness of these finishing panels must be between : 18 to 22mm (3/4" to 7/8").
- Once this system is out, the **Opla Folding** comes flush with the counter.
- System equipped with soft-close pistons for a smooth closing action.
- Aluminum slides with a high weight capacity of 40kg (88lbs) evenly distributed.
- It can be installed in furniture, pantry or under a counter with a minimum depth of 540 mm (21 1/4"). The shelf or counter thickness can be of 16mm to 35mm (5/8" to 1 3/8")..
- The system can fit into cabinet width of 450mm to 900mm (18" to 36").
- Total extension is 500mm (19 11/16")

Description

Genius solution for any room in the house !

Opla Folding is a revolutionary solution for organizing tight places. Hidden in taking the place usually used for a drawer or underneath a counter or shelf when not in used, you just need to pull it out to gain an additional work surface to the counter in a single movement. **Opla Folding** offers an extension of 500mm (19 11/16") and a weight capacity of 40kg (88lb).
