542L30 – Left flap fitting

The new 542X30 flap fittings provide hinging and support function all-in-one solution. Thus, no concealed hinges are necessary on the top panel. Based on spring technology, this series combines flexibility and durability.

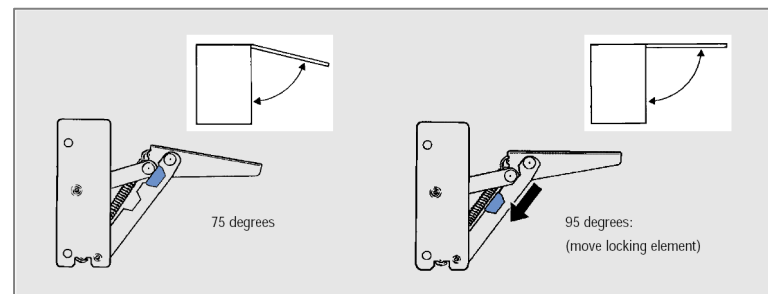

The new 542X30 flap fitting pair features two variable opening angles 75° and 90° and are suitable for wooden flaps. Their installation is very easy and fitting is maintenance free

542R30 - Right flap fitting

Product benefits

- Adjustable springs
- Variable opening angles: 75° or 90°
- Perfect access to the inside of the cabinet
- Convenient for wooden flaps
- No concealed hinges in the top panel
- Two-in-one solution: hinging and support function
- 32 mm hole spacing system
- Comes in a white epoxy finish
- Excellent running properties due to maintenance-free plastic bearings
- Height adjustment of the flap due to oblong holes

One fitting - two opening angles
