

Prestige™ Circular Saw Blade

THE SAW BLADE THAT DOES IT ALL!

10" To 12" - 18° Hook - Alternate Top Bevel (ATB) Grind

Saw blade details:

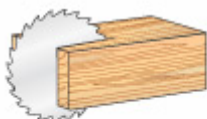

- Massive (.105" thick!) tool-steel plate with copper plugs practically eliminates vibration from the saw blade.
- Precision-ground D-10 carbide teeth (20° ATB, 18° hook) are individually computer-verified for run out of less than 1/10,000" on all axes.

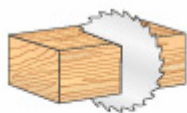

Prestige Testimonial

Over the years, I've tried virtually every major brand of saw blade. The Amana Prestige has all the performance features that I want in a blade, including crisp, smooth cuts both with and across the grain, low feed resistance and incredible edge retention. Without a doubt, the Amana Prestige is the finest combination saw blade I've ever used.
