KBIS EVENT

ON TREND WITH INNOVATIVE NEW PRODUCTS

Richelieu is delighted to return to the kitchen and bath industry's premier trade show for designers, contractors, and cabinet-makers for the event's 2024 edition. This year, we are showcasing a vast range of products on the leading edge of kitchen and bathroom design. From sophisticated lighting to space-saving, clutter-busting elements for the kitchen, right down to the details and beauty of our amazing selection of decorative hardware and panels, Richelieu cannot wait to show you the next great must-have innovations for your clients.

Richelieu is the industry's expert in sourcing and manufacturing products that combine durability, design, function and uniqueness. We carry more than 130,000 products from around the world, offering you original and effective solutions to make interiors look stunning but also ensuring that the nuts and bolts of every door, drawer and pull-out properly work. Stop by our **booth #N3117** and let's talk about all the ways Richelieu can help you take your projects to the next level.

DECORATIVE HARDWARE

that pulls you in

Richelieu has long been one of the leading sources for the best selection of extraordinary knobs and pulls. This year, we are excited to bring to Las Vegas several new spectacular collections we've curated from around the globe.

We are thrilled to be debuting the RIALTO Collection - Limited edition, a new line inspired by Italian architecture that relies on bold combinations of colors and materials, in clean distinctive shapes that channel the energy and creativity of Italian fashion. Rialto challenges the accepted approach to color in decorative hardware, bringing an aesthetic edge of style and flair to any cabinet design.

The AUTORE and MUSE collections are the work of renowned European and Canadian designers, whose creative approach essentially renders decorative hardware as miniature works of art. Styles range from minimalist to sculptural to organic, available in a variety of textures and finishes that transform cabinet doors and drawers into striking focal points.

RICHELIEU brings you Trigon and Blade for a smarter home

One important development in living spaces is making the user's experience more smarter and more practical while also keeping a room clutter-free. Richelieu is debuting two innovative yet simple ways to make the use of counter space and storage furniture more ergonomic and functional.

Blind corner and end cabinets are often hard-to-reach spaces, resulting in unused storage space. TRIGON, an innovative German-engineered pull-out shelf system, solves the problem of dead space in corner and end cabinets through an innovative design that maximizes the use of cabinet area. The unit increases storage space and functionality by up to 40% compared to an unequipped cabinet.

BLADE offers a dual-functioning cutting board and cutlery tray that can be pulled out as needed and retracted after use inside a standard drawer space in a 24" cabinet. Made of 100% hardwood maple, the cutting board can easily be removed for cleaning. The bottom cutlery tray accommodates cutting knives and other utensils typically needed for food preparation and can also be accessed independently without opening the top cutting board.

The design is a response to the need to simplify the use and storage of kitchen accessories and keep countertops neat and orderly. Stop by our booth for a demonstration of Trigon, Blade or one of the many other great ideas Richelieu is proud to bring to KBIS 2024.

LIGHTING

all the many bright ideas at Richelieu

How you light a room or cabinetry plays a big role in the overall atmosphere of a design. Richelieu is a highly specialized source for premium lighting designs, and we carry a huge selection of under-cabinet, room, and accent lights. Our Online Lighting Configurator can help you navigate to just the right LED lighting solution for your projects. Or go next level with Richelieu's smart lighting systems, offering the ultimate in light control through voice command and smartphones. This year, we are excited to bring several new lighting products to KBIS.

The UNIKA luminaire doubles as an under-cabinet light and device charger, marking another step forward in making rooms more functional through accessories that cater to the modern lifestyle. Also generating a buzz is our NEON FLEX 3D lighting for outdoor installations. This ultra-flexible sheath for an LED ribbon can bend along curved surfaces to follow the contours of objects and elements in your designs. Uniform linear illumination without any glare or pixelation creates a stunning yet pleasant light accent in any area.

SMART accessories for the kitchen

OPLA +39 Pull-out countertop

One of the big trends in kitchen design these past years has been making the kitchens more functional but without creating more clutter. Richelieu has been out in front of this trend through our many ingenious solutions for kitchen storage and accessories.

The OPLA +39 pull-out countertop marks another innovation in transforming surfaces into multi-functional areas and better organizing small spaces. This work surface aligns flush with adjacent surfaces when open but stays hidden behind a standard drawer face when not in use. Also ideal for office settings.

Other clever, ergonomic solutions include the QANTO electric lift system for better storage and easier access to heavy appliances. The Riverso two-way drawer system continues to wow designers and builders in how it dramatically improves the flow of a room with an island or two-sided countertops. Or come see firsthand how our Table Extension Mechanism lets you add a retractable table surface that's big enough to comfortably seat two or three persons.

T-ABLE XL III

Pull-Out table mechanism

The T-ABLE XL III optimizes space in a small kitchen. Perfect for small spaces and are easy to fold away to keep them hidden and out of the way when not in use.

SPACE STEP

Pull-out, step platform, and storage

Our made-in-germany SPACE STEP offers additional storage and a step stool that hides away in the toe kick of a base unit. The award-winning Space Step makes access to higher cabinets easier for both children and adults and relies on state-of-the-art opening and closing mechanisms with added safety features that immediately detect the user's weight.

QANTO

Electric lift-up system with LED lighting

Take full advantage of the effortless movement to store heavier small appliances such as coffee/espresso machines, mixers, cookware or even a hidden serving station. QANTO can also help enhance an entertainment area by incorporating it into a bar or other furniture.

RIVERSO

Sliding system

A revolutionary hidden and bidirectional sliding system that allows drawers to open from both sides of a cabinet.

Stylish closet accessories and systems

Richelieu has long been at the forefront of innovation in closet design and is proud to offer a deep catalog of cutting-edge closet accessories, built-in lighting solutions and paneling options to suit every décor. This year, we are excited to showcase CONERO, a comprehensive collection of closet accessories from elegant pull-down rod with shelf storage. Paired with a soft close drawer system featuring glass fronts and unique finishes. Design and function are the key elements in Conero range and are designed to elevate your storage experience. Plus, a new durable material has been developed for the Conerocloset system. Indeed, closet hangers are made of a mix of recycled plastic & meadow grass. It's lighter, stronger, and more durable! It's a way to significantly reduce carbon footprint and contribute to a healthier environment for us all!

CONERO Closet accessories

VERTIKO Closet systems

VERTIKO is a fully customizable closet system that combines total elegance with ultra-functionality. Based on display concepts in luxury stores, Vertiko lets you create custom wall displays for storing clothes and accessories. The Vertiko Walk-In Closet system offers a complete package of fittings and components for use in various-shaped rooms. Stop by our booth and let's talk about all the latest smart solutions for creating highly functional closets and storage areas with superb designer aesthetics.

SURFACE BEAUTY

The right decorative panel in a room is transformative, elevating a closet door or wall to a veritable design statement. Richelieu is a market leader in sourcing a wide selection of innovative, high-tech panels that are also simply beautiful. SILENCIO panels let you improve the sound quality of any room and create warm, inviting spaces all at once. NATURE PLUS Plus is a premium thermos-structured panel, engineered in Italy, that adds character and style to a space through the richness of its texture and colors offering both tactile and visual pleasure. In commercial settings, consider BRILLANTÉ, which presents perfectly smooth panels using state-of-the-art manufacturing technology, resulting in a gloss level of over 90%, exceeding current industry standards. The gleaming surface is strongly resistant to UV rays as well as heat and scratches. BRILLANTÉ is an ideal way to add color and gloss to wall areas, dividers, architectural elements and closets.

From the EASE and ELEGANCE of sliding doors to a STURDY and AESTHETIC solution that makes kitchen counters and vanities safe and secure.

SLIDING DOOR SYSTEM

Hardware systems and mini sliding barn doors

KOLOSSUS

Countertop bracket

Space-saving, stylish, modern — SLIDING DOORS are an excellent way to streamline room flow or separate rooms without obstructing doors opening into or out of an area. Richelieu offers a number of premium sliding door systems that include pocket doors, barn-door systems, folding sliding doors and even motorized systems. Plus, the trend of mini sliding doors gives you ways to make kitchen or bathroom under-counter storage easily accessible with style. From rustic to contemporary, for transforming kitchen islands or vanity shelving into neat, functional storage areas that keep the area in front free and clear. Rethink how you create storage and shelving in your projects and take advantage of the ergonomics and designer elegance of sliding doors.

Free-floating countertops in either a kitchen or bathroom are a great way to take advantage of space without cluttering up the floor with bases or legs. But unsightly, bulky hardware can drag down the aesthetic of these surfaces and the overall design of a room. The KOLOSSUS bracket series offers a sturdy, aesthetic solution that makes kitchen counters and vanities safe and secure but with a minimalist, designer look. These brackets are a favorite among designers and architects specializing in healthcare or senior-living facilities, but they also work well in small residential half bathrooms or powder rooms where a practical but contemporary flair is on the punch list.
