

CARVING A NEW PATH IN HARDWARE SOLUTIONS

With a vast range of innovative products ranging from sleek decorative hardware to premium quality panels to versatile kitchen accessories, Richelieu is pleased to showcase its latest collection of cutting-edge hardware solutions at this year's International Woodworking Fair.

MAGIC CORNER II FIORO

STORAGE IN STYLE

RECLAIMING SPACE WITH FUNCTIONAL DESIGN

Attendees at this year's IWF will be treated to a sample of Richelieu's extensive storage solutions that are designed to solve even the most challenging spaces. The woodworking community will be able to see for themselves how Richelieu's functional, designer storage solutions can organize spaces where clutter is an issue.

This year, Richelieu is showcasing the **CONERO** line, a comprehensive closet system constructed with durable materials and offering stylish storage to transform a closet into the ultimate dressing room. CONERO closet accessories include elegant pull-down rods with shelf storage, soft-close drawer systems featuring glass fronts, unique finishes and closet hangers that are made of a mix of recycled plastic

and meadow grass so they're lighter, stronger, and more environmentally friendly.

The use of tempered glass makes clothes and closet contents more visible, maximizing the use of closet space while the functional pull outs with rounded corners move toward a trending soft-edge design. With design and function at the forefront, the CONERO line can enhance any space or project.

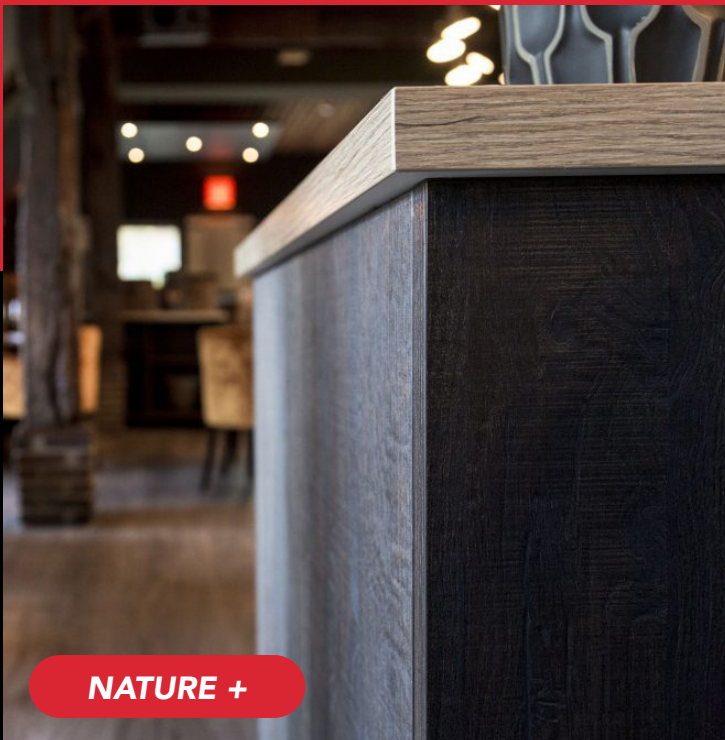

In addition to CONERO, Richelieu will be displaying its renowned and stylish pull-out closet accessories, including new valet rods, belt racks, tie racks and scarf racks.

SURFACE BEAUTY

DECORATIVE AND FUNCTIONAL
PANELS AND COUNTERTOPS
FROM RICHELIEU

Richelieu will showcase the transformative power of decorative panels and cabinet doors at IWF 2024 so that woodworkers can see for themselves how these products can enhance their next project. As a market leader in sourcing a wide selection of innovative, high-tech panels that are also beautiful, Richelieu can help you add that special touch to your surfaces – from furniture, cabinets, cabinet doors, and more.

Richelieu offers a wide range of panel finishes from super matte to high-gloss with different textured decorative surfaces that come in a variety of colors to complement your designs.

For example, the **NATURE +** is a premium thermos-structured panel, engineered in Italy, that adds character and style to a space through the richness of its texture and colors, offering both a tactile and visual aesthetic.

In commercial settings, consider **BRILLANTÉ** custom-made cabinet doors. **BRILLANTÉ** presents perfectly smooth panels using state-of-the-art manufacturing technology, resulting in a gloss level of over 90%, exceeding current industry standards. The gleaming surface is strongly resistant to UV rays, heat and scratches and is an ideal option for adding color and gloss to wall areas, dividers, architectural elements and closets.

For a modern and clean look, Richelieu's **SYNCRON** panels are the perfect addition. They are designed to reduce bacteria living on surfaces thanks to their antibacterial properties, providing you with cleaner spaces and healthier living.

To create warm inviting spaces and improve the sound quality of any room, look no further than Richelieu's **SILENCIO** panels, which offer a harmonious blend of performance with the warmth and richness of wood.

When cleanliness is a priority, **PLAS-TEX NPR Panels** are perfect and made from 100% recycled plastic. **PLAS-TEX®** is the only 100% waterproof sanitary barrier for interior applications, offering a UV-resistant, textured surface that is easy to clean and cut, resists mold and bacteria, and prevents the appearance of scratches.

Richelieu's unmatched selection of decorative panels also includes functional and stunning decorative **WOOD TAMBOURS** and options from the **FORMART** Collection.

Richelieu **IMPREZA** designed to outperform. It brings you a selection of high-performance compact surfaces that are unique, versatile, and carefully designed to surpass expectations, whether used for exterior projects (garden furniture) or interior projects (countertops, cabinets and wall panels). These innovative surfaces feature reticulated polymer technology, creating a waterproof shield that protects your exterior furnishings from daily weather variations and extreme climatic conditions.

IMPREZA LAMINATES

LIGHTING

BRIGHT IDEAS TO ILLUMINATE ANY AREA

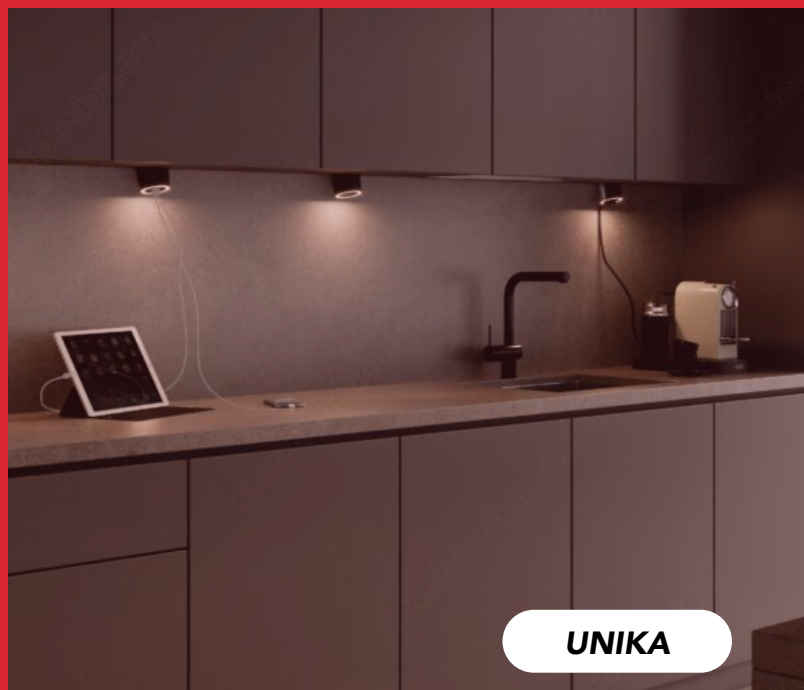

HIDDI

At IWF 2024, Richelieu will be highlighting high-quality lighting solutions that blend meticulous design with technological innovation and simplicity. For a modern option, consider Richelieu's smart lighting systems, which offer the ultimate light control through voice commands and smartphones. Richelieu's Online Lighting Configurator can help chose the perfect LED solution for any projects.

Richelieu will showcase several lighting products, including the **UNIKA** luminaire, which doubles as an under-cabinet light and device charger – a clever design offering more room functionality for modern living.

Also generating a buzz is our **NEON FLEX 3D** lighting for outdoor installations. This flexible lighting solution bends along curved surfaces to follow the contours of objects or elements in your décor, and brings out the light through walls, ceilings or millwork. Uniform linear illumination without any glare or pixelation creates a captivating light accent in any area.

UNIKA

Additionally, for an easy-to-install solution that can illuminate any space, look no further than the **D-MOTION LED** lighting system. Combining technology and Italian design, this innovative system can light up even the most unconventional areas of the home. With D-Motion, it's never been easier to change color temperature, switching from super warm white to neutral white with a single click. Richelieu's D-Motion lights are also available in a range of puck and tape models to suit your specific project needs and to allow for customizable installation.

For more information discover the new **LuminR** catalog.

KITCHEN ACCESSORIES

ORGANIZATION AT ITS FINEST

This year at IWF, Richelieu is pleased to showcase two new innovative, yet simple ways to keep a room clutter-free and make the use of counter space and storage furniture more ergonomic and functional. **TRIGON**, a German-engineered pull-out shelf system, solves the problem of hard-to-reach unused space in corner and end cabinets through an innovative design that maximizes the use of cabinet area.

We also can't forget to mention the **RIVERSO** bidirectional sliding system, which allows drawers to open from both sides of a cabinet. This ingenious device optimizes the flow between rooms when installed in a kitchen island or room separator.

TRIGON

SPECIALIZED HARDWARE

IT'S ALL IN THE DETAILS

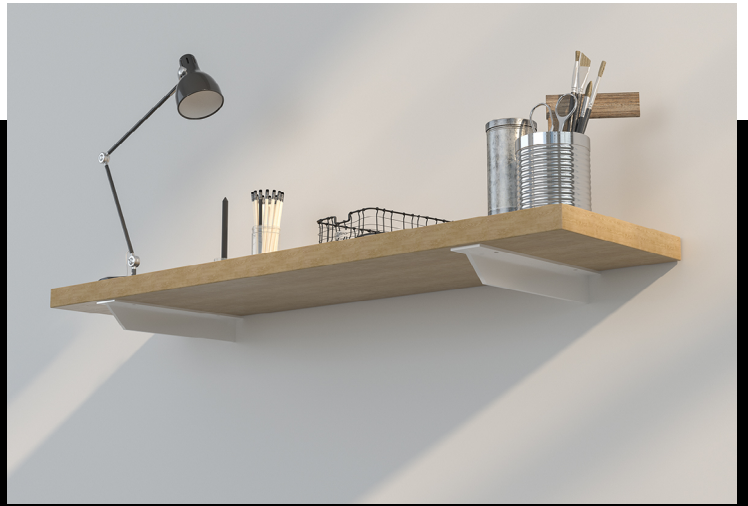

Woodworking professionals looking to save space with free-floating countertops in either a kitchen or bathroom will be happy to see the **KOLOSSUS** bracket system at IWF this year. This system offers a sturdy, aesthetic solution to take advantage of space without cluttering up the floor with bases and legs. The brackets make kitchen counters and vanities safe and secure but with a minimalist, designer look. A favorite among designers and architects specializing in healthcare or senior-living facilities, the brackets also work well in small residential half bathrooms or powder rooms where a practical but contemporary flair is desired.

Richelieu will also showcase the enhanced **HAWA CONCEPTA III** system for single pivot and slide-in pocket cabinet wood doors. The system is perfect for commercial and residential applications in kitchens, pantries, closets, laundry rooms, meeting rooms, food and beverage centers and equipment storage. There are two versions available: the PUSH to open version for applications without handles or the PULL version for applications with pull handles. With floor-to-ceiling designs, high boards, or wall units with two, three or four doors possible, the HAWA CONCEPTA III provides unlimited creative freedom for buyers and their clients.

HAWA CONCEPTA III

KOLLOSUS

Along with these efficient and helpful accessories, Richelieu is excited to present the always popular **R Push device**, a unique opening system that enables complete door opening by pressure, combined with smooth closing. The key differentiator of this advanced mechanism is its revolutionary assistance arm that opens doors completely following activation by pressure. The R Push is a handle-less, cable-free solution that requires no electrical connection.

For product demonstrations, stop by our booth C1410 at IWF 2024.
