ROYAL Collection

When tradition, function and aesthetics are combined with the most precious materials such as gold and silver, the result is an exquisite and versatile collection that will lend a regal touch to any furniture or cabinetry.

90/131
24K gold plated and black enamel

90/172
Silver plated and black enamel

90/180
Metal & genuine black leather

30/180
Metal & genuine white leather

MATERIA VIVA Collection

Designer and artist Giuseppe Lorenzi has given us true, tiny masterpieces. Using the 17th-century Raku pottery technique, he has taken his sensitivity for the human experience to create the most aesthetic handles and pulls. The Raku tradition was born when a tea master recognized the beauty of random effects created on tiles while they were being fired by craftsmen. Each handmade Materia Viva piece continues this tradition in reflecting the uniqueness of the human spirit through natural elements.

PORCELAIN Collection

The traditional, refined material of porcelain is the focal point of this extensive line of outstanding knobs and pulls. Created by a number of renowned designers, these harmonious pieces have a simple, Zen-like look. New aesthetic ideals inspire both their form and function. The porcelain itself, a naturally decorative material, makes a clear yet elegant statement through its delicate texture and purity.

RICHELIEU'S DREAM CLOSETS

Richelieu's line of **designer and functional** solutions for closets will help you organize your customers' most challenging spaces!

Five innovative systems from designer to functional, made of high-quality metal, wood or synthetic materials in a variety of finishes and a wide range of options for pull-outs.

Innovative mounting systems are simple to install and can be scaled to fit even the most unconventional closet space.

Large selection of matching accessories.
