*Normally, our products are packed and shipped in transparent plastic tubes. The bulk marking indicates that the product will be shipped without its standard packing.

PRODUCT DESCRIPTION

PAPER BACKING

Veneers with paper backing need to be glued using contact cement. Two backing thicknesses are available: .010" or .020". Veneers with .010" backing are available preglued or prefinished.

.010" THICKNESS

Recommended for perfect surfaces.

.020" THICKNESS

Recommended for surfaces with slight imperfections.

PSA (PEEL AND STICK)

Paperback PSA (Pressure Sensitive Adhesive) may be filled, sanded, stained, and final finished just like paperbacked veneers with the added convenience of simple peel and stick attachment.

HARD BACKER

The BP Brown and PB Beige hard backer veneer sheet are a semi-flexible product. It has flexibility making it possible to use with small curved application.

Its rigidity provides resistance to impact, and eliminates the telegraphing of substrate imperfections.

This product offer a superior stability. Moreover, it has a great fire and moisture resistance and there is no added formaldehyde.

2-PLYS (wood on wood)

2-ply veneer is made of two layers of veneer, making it stiffer and more resistant to impacts. Its use is strongly recommended for applications requiring a water-based glue.

HPL (High Pressure Laminate)

The HPL is a high pressure laminate semi-flexible hard backer veneer sheet product. It has flexibility making it possible to use with medium curved application. Its rigidity provides resistance to impact and eliminates the telegraphing of substrate imperfections. This product offer a superior stability.

CUT CODE
F/C: FLAT CUT
Q/C: QUARTER CUT
R/C: ROTARY CUT
N/C: NO CUT
V/G: VERTICAL GRAIN

MANUFACTURING AND APPEARANCE

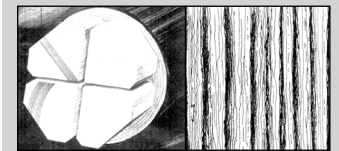

MANUFACTURE APPEARANCE

FLAT CUT

Also called PLAIN SLICING, it is the most common method of veneer manufacturing, producing a grain pattern known as cathedral. Because each leaf in the flitch is similar, a consistent and even matching pattern is possible. Flat cut veneer is ideally suited for wall panels and furniture.

MANUFACTURE APPEARANCE

QUARTER CUT

This cut requires the largest diameter logs and produces straight-grained veneers. The quarter slicing of oak can result in the appearance of flake.

RIFT CUT

Produced by cutting at a slight angle to the radius to produce a quartered appearance without excessive ray flake. The rift cut method is commonly used for oak, and can only be used on sizable logs. Rift cut veneer can easily be sequenced and matched.

MANUFACTURE APPEARANCE

ROTARY CUT

The log is turned in a circular motion against a knife, peeling off a continuous thin sheet of wood veneer (like unrolling wrapping paper). It is the most economical method of producing veneer, resulting in the highest yield. The grain is inconsistent and sheets are most difficult to match. This type of veneer is best suited for paint grade or utility surfaces.

FormArt Collection

Our FormArt panels are produced from MDF and are available in contemporary designs. Panel thickness varies according to the pattern chosen. Panels can be installed sequentially and have a white melamine backing to ensure greater stability.

Application: Ideal for wall or ceiling applications

- Panels are paintable, and can be tinted or treated in a thousand ways
- Perfect for contemporary designs
- Made of MDF Superior Plus
- Other models and sizes are available upon request
- Sold unfinished

Specification(s):

- Width: 48"
- Height: 96"
- Thickness: 1"
- Sequential to: 48" and 96"

Also available by special order:

- Thermoplastic-covered panel
- Fire retardant
- Formaldehyde-free panel
- Moisture-resistant panel

Sold per sheet

FormArt Collection

Our FormArt panels are produced from MDF and are available in contemporary designs. Panel thickness varies according to the pattern chosen. Panels can be installed sequentially and have a white melamine backing to ensure greater stability.

Application: Ideal for wall or ceiling applications

- Panels are paintable, and can be tinted or treated in a thousand ways
- Perfect for contemporary designs
- Made of MDF Superior Plus
- Other models and sizes are available upon request
- Sold unfinished

Specification(s):

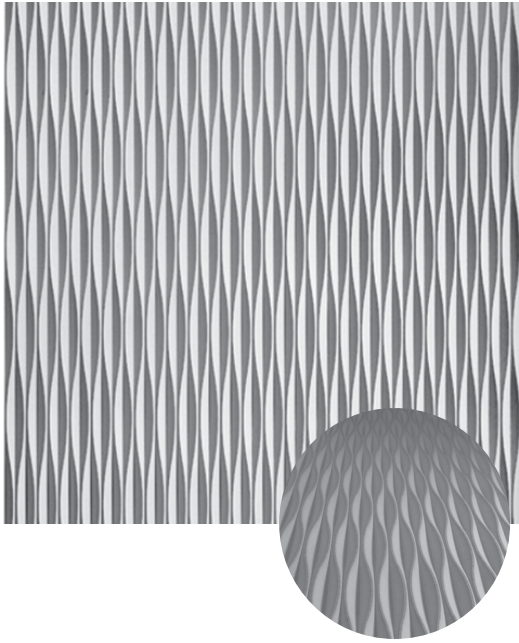

- Width: 48"
- Height: 96"
- Thickness: 1"
- Sequential to: 48" and 96"

Also available by special order:

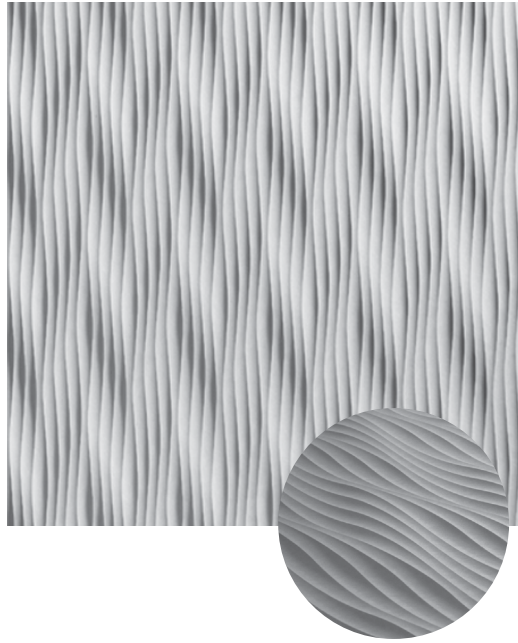

- Thermoplastic-covered panel
- Fire retardant
- Formaldehyde-free panel
- Moisture-resistant panel

StrukArt Panels

Hand-finished wood, treated to look aged – the primary material used to create Antik panels. The wood is then transformed into veneer and pressed into molds that mimic the wood surface of yesteryear. The process preserves traces left by the passage of time to create panels that are authentic, unique and expressive.

Panel length indicates direction of embossed wood-grain pattern.

- Repeating Pattern: No
- Panel Core: MDF
- Veneer: Real Oak
- Material: Wood
- Lacquered: Yes (Matte)

Brillanté

The Brillanté Collection revitalizes the MDF panel, offering you components designed to create stunning interiors.

The Brillanté Collection produces perfectly smooth panels using its state-of-the-art manufacturing technology, resulting in a gloss level of over 90%, and exceeding current industry standards.

Both sides of the MDF core are covered with decorative paper and laminated. A high gloss finish is then applied to the outer side of the panel and a matte finish to the interior side. Finally, the panel is covered in a removable protective film.

With their high gloss lacquer finish, Brillanté Collection panels are the ideal solution for creating:

- Decorative walls
 - Architectural elements
 - Kitchen cabinetry
 - Closet organizers
 - Home offices
 - And so much more
- A 90% gloss level
 - Excellent resistance to heat and scratches
 - Resistant to UV rays and discoloration
 - Available with two-tone or identical color edgbanding
 - Ideal for vertical applications

Specification(s):

- Width: 48"
- Length: 108"
- Thickness: 18 mm

Harmony

Harmony acrylic panels are a high-quality product that provides a strong visual impact and stylish results. These panels are available in a wide range of colors with exactly the same hue, whether in an ultra-gloss or super-matte finish.

What's more, the super-matte finish leaves no visible fingerprints behind.

Highly scratch resistant, the Harmony series with its 18.8 mm "carb2" particle core panels is particularly suitable to furniture making and cabinetry. The 1.4 mm sheets can be used for store fixtures, living room, kitchen or bathroom furnishings, thus providing tremendous flexibility.

Advantages

- Highly heat resistant: will not warp
- Highly abrasion, water and stain resistant
- Resistant to UV rays and discoloration
- Easy to clean

Ultra-gloss finish

- Extremely resistant lacquered mirror effect
- May be repolished

Super-matte finish

- Leaves no visible fingerprints behind
- Ultra-opaque surface
- Chemical and stain resistant

Antibacterial

Three colors with super-matte finish are available with Zerobact technology, which prevents the growth of bacteria on surfaces, making it ideal for medical facilities, laboratories, bathrooms, schools and daycare centres.

Decorative Metal

High-pressure laminate coated with a layer of aluminum, copper or stainless steel. The decorative layer is either lacquered or anodized and provides permanent protection against corrosion and oxidation.

Application: Any vertical interior surface, store fixtures, furniture, columns, display cases, wall and ceiling panels, doors, exhibitions stands, elevators, etc.

- All sheets are covered with a removable protective film
- Panels have a formaldehyde emission of <0.01 PPM according to EN DIN 717/1
- Fully recyclable core composed of 100% organic secondary components obtained from renewable resources
- Not recommended for exterior use, high-humidity areas, or horizontal surfaces with high abrasion

Specification(s):

- FSC: Yes
- Width: 48"
- Length: 96"
- Thickness: 1/32"

Decorative Laminate

More than 60% of the board is composed of recycled paper and the remaining 30-40% is a bio-resin. Surfaces of the board are not corrosive, nor do they oxidize. They require no additional surface treatment (e.g. varnish or paint). All decorative surfaces can be cleaned with a mild soap solution. Abrasive cleaners such as scouring powder should be avoided.

- 100% ecological
- Non-polluting
- Non-petroleum based
- Made of recycled core, decor paper, and natural resin extracted from sugar production waste
- The material also has the advantage of a high degree of flexural rigidity due to its high modulus of elasticity
- Application on any vertical interior surface: Store fixtures, furniture, columns, display cases, wall and ceiling panels, doors, exhibition stands, elevators, etc
- Not recommended for exterior use, high-humidity areas, or horizontal surfaces with high abrasion

Specification(s):

- FSC: Yes

Lightweight panels

Lightweight panels are made of honeycomb paper cell and recycled wood particles.

Hot-melt polyurethane glue (without urea-formaldehyde) is used during assembly.

Components - Lightweight panels with finish on required sides only (for cabinets and furniture work)

Advantages

- Strong, rigid, and stable
- Easy to cut and drill, perfect for curved and complex shapes
- Major savings in shipping and handling, compared to traditional panels
- Highly recyclable content. Most of the product components are made from recycled and recyclable fibres
- Crush resistant

Application

- For cabinet and furniture work
- Cabinets, counters, and work surfaces
- Residential, commercial or institutional applications
- Office and corporate furniture

Sold per panel

Lightweight panels

Lightweight panels are assembled with honeycomb paper cell, made from recycled fibres.

Hot-melt polyurethane glue (without urea-formaldehyde) is used during assembly.

Panels are considerably lighter than traditional panels, creating optimal ergonomics for the user as well as major savings in transportation costs.

Panels are finished on all sides except for the side to be fixed to the wall.

Sold per panel
