POST MOUNTING ANCHOR

Solid and robust, this product is designed to anchor posts on terraces, porches and verandas.

- · Provides five anchor points the longer center screw allows to secure the post to the surface of the terrace
- · Additionally secured with 4 construction screws
- The 3 1/2" (89 mm) square base plate is perfect for common post sizes
- The plate is flush with the post making it perfect for slipping PVC sleeving straight over the post
- . The base plate can be routered into the base of larger posts thereby completely hiding the base plate permitting indoors use
- Epoxy coated and acrylic finish for maximum protection

BEECH DOMINO TENONS

Festool Beech Tenons are made from all-natural, solid beech hardwood for strength and stability.

- The flat, elongated design will not rotate, ensuring perfect alignment for both edge and face gluing
- Suitable for both plywood and solid wood applications, the dense beech tenon will not expand or telegraph through material, leaving a clean, flat, and consistent surfaces

Application: The beech tenon serves as a true floating tenon in mortise and tenon applications such as furniture, cabinetmaking, casing and frame work.

ANGLED SLIPFIX RAILBOLT

Angled Slipfix Railbolt is the latest product for the stair industry and is the sister product to the Slipfix Railbolt, this connector particularly designed for joining handrail to a post at an acute angle (upstairs joint).

The angled shaft is preinstalled into the rail with a slight protrusion then can be engaged to the fitted keyhole disc in the post. Once the connection is made tightening takes place using the Zipbolt gear drive system and a side ratchet tool or Allen key providing a perfect joint.

STRIPLOX JOINING SYSTEM

Aesthetically, Striplox replaces visible screws, brackets, fittings, connectors, latches, cam and dowels, mounting blocks and other mechanical components providing leading edge design solutions.

- · No visible fixings Fully concealed joint
- · Eliminates damage Install panels during final build
- · Reduces labor costs with fast on site assembly
- · No tools or trade skills required for assembly
- · Delivers strength, durability and versatility in one action by transferring load capacities evenly over the entire joint
- · Can be surface or rebate mounted in either vertical or horizontal positions
- Variety of mounting options glue and or screw fix
- Designed using the internationally recognized 32 system

STRIPLOX PRO 23 CONCEALED CONNECTOR

For narrow profile for easier concealement

The Striplox Pro 23 is ideal for installing hanging cabinets, floating shelves, bookcases, artwork frames, mirrors and feature panels.

Sold by pair

STRIPLOX JOINING SYSTEM

STRIPLOX 90° RIGHT ANGLE JOINER

Rigid and strong 90° angle connector

Striplox 90D is an innovative engineered solution designed to quickly and easily connect any right angle joints. Ideal for common joints, including mitre joints, butt joints, tee joints, square joints, frame joints and flush joints. Striplox 90D is the must use connector for achieving the highest level of satisfaction. The Striplox patented design pulls the substrates firmly together to form a strong and tight joint in one simple action by distributing the loads evenly over the entire connector and joint.

The advantages of the Striplox 90° Right Angle Joiner over conventional fasteners and connectors include unmatched cost savings in transportation, assembly and labour. These savings are achieved by enabling rapid assembly times and an effortless joining operation.

These connectors require no tools or loose fasteners on site or point of use during assembly. Unlike other 90 degree products on the market, Striplox 90D offers a more stable positioning of the joint as the length of the product produces a perfect 90 degree joint every time.

The Striplox 90D connectors are suited for a range of building materials including timber, medium density fibreboard (MDF), particleboard, plastic, lightweight sandwich, composites and more.

Available in Polypropylene (PP) and Glass Reinforced Nylon (GRN) for jobs that require increased strength, stiffness and abrasion resistance.
